

## How to playback your AVI/MPEG4 file at your PC.

There are several files in our CD for viewing the back-up file from our DVR. Pls follow the direction for viewing AVI/MPEG4 file at your PC.

A. For download **Window Media Player 10+(above)**, please go to

<http://www.microsoft.com/windows/windowsmedia/player/10/default.aspx>

B. **XviD** : when you playback AVI file and need to download codec, please run this file from our CD to your pc.

C. Please follow next steps for showing the **Time Table(Stamp)** at window media player.

1. Click down arrow key (for access application menu) on the top title.  
Go to Play → Captions and Subtitles → “ON if available.
2. Click down arrow key (for access application menu) on the top title.  
Go to Tools → Options → Security → Show local captions when present (or Run scrip commands when present).

You'll see the event time showing while you playback video/audio.

D. **Setup\_AIP** : when you playback MPEG4 file, pls run this software.

E. **Setup** : when you need to install our client software(Network Viewer : MPEG4 NVR), please run this file.
